I am a UI/UX Designer and a web developer with computer science background. I follow strong HCI principles in my projects and have experience in creating meaningful and user-friendly designs. With designing, I also like to develop my ideas to make it come to life. I am comfortable working on MERN Stack and have good knowledge to build apps. I am always looking for diverse opportunities to build my portfolio and always ready to contribute the best Interface and experience to the product. I am not only involved in the tech field but also in social field contributing to volunteering opportunities.
